

## **Game Title:** Ser Gladiators: A Battle Arena Fighting Game

### **Introduction**

Prepare to challenge your friends or rivals in the death match of the century! Ser Gladiators brings its players to be the best weapons masters in the realm. Battle your friends and see who can defeat the other first! Will you stand victorious or suffer the shame of defeat?

### **Mechanics**

Both players start at the ends of the arena with no weapon in hand. They must race to the middle and equip their weapon of choice. And in order to win, one must bring their opponent's health down to zero!

### **Character**

You control a gallant knight turned gladiator. These gladiators are steadfast in always facing the mouse cursor. When the player left-clicks/right-clicks/middle clicks (if that's how you play...) and your gladiator has a weapon equipped, the gladiator is then able to attack.

- Press the following keys for movement:
  - W - move up
  - A - move left
  - S - move down
  - D - move right
- Press 0 to challenge your enemy to a rematch.
- Press O to show your weapon's hitbox; P to hide it.

### **The Weapons**

The player can choose from four different weapons: the sword, the spear, the axe and the gun. The sword has the shortest range but packs a big punch. The spear has a longer range but only attacks on a straight line. The axe has cleave but has a short range. Lastly, the gun has a really long range but is very difficult to aim, as it has a fixed range.
